# ON THE ROAD TO RIO: HOT TOPICS IN SPORTS IMAGING

Venue: Lord's Cricket Ground, London

CPD: 5 CREDITS

This comprehensive one-day programme focuses on the forthcoming Olympic Games in Rio and draws upon the experiences of UK radiologists who delivered services at the London 2012 Olympic Games.

You will hear about latest developments in sports and MSK imaging using a combination of didactic lectures and more interactive case-based teaching. Discussion will be encouraged to allow delegates to engage with the faculty and gain as much clinical benefit from the day as possible.

This study day would be a useful refresher course for practising radiologists with an MSK interest who may encounter these examinations as part of their practice. The event would also be valuable to general radiologists and senior radiology trainees developing an interest in musculoskeletal radiology.
