

International Day of Radiology &
World Radiography Day
8 November 2016

INTERNATIONAL
DAY OF
RADIOLOGY
AN INITIATIVE OF THE ESR, ACR AND RSNA
Supported by the British Institute of Radiology

The British Institute of Radiology has produced this crossword in support of International Day of Radiology & World Radiography Day 2016. The theme of this year's International Day of Radiology is breast imaging.

Across

3. Tiny specks of mineral deposits (calcium), that can be scattered throughout the mammary gland, or occur in clusters, and may indicate the presence of breast cancer (18)
6. Tissue or mass with thin lines radiating from its margins that is suggestive but not diagnostic of malignancy (10)
8. Abbreviation for National Health Service Breast Screening Programme (6)
9. Image guided procedure to help locate an abnormality and remove a tissue sample (11)
10. Scheme for putting the findings from mammogram screening (for breast cancer diagnosis) into a small number of well-defined categories (6)
11. A firm lump that moves around easily in the breast and is more common in younger women (12)

Down

1. Abbreviation used for a technique using a thin, hollow needle to remove samples of breast tissue (4)
2. A damaged gene which can lead to increased risk of cancer, particularly breast or ovarian in women. (4)
4. An imaging programme used to detect cancer before there are any signs or symptoms and when it is more treatable (9)
5. Specialized medical imaging that uses a low-dose x-ray system to see inside the breasts (11)
6. Lymph node that is the hypothetical first lymph node or group of nodes draining a cancer (8)
7. Abbreviation for the earliest form of breast cancer that hasn't spread out of the milk duct to invade other parts of the breast (4)
