CURRENT TRENDS IN NUCLEAR CARDIOLOGY

VIRTUAL EVENT

HOSTED BY THE BIR IN ASSOCIATION WITH

AMERICAN SOCIETY OF NUCLEAR CARDIOLOGY (ASNC)

Welcome to the first joint BIR/ASNC Nuclear Cardiology Clinical Update 2021! This half-day virtual event will cover the existing and new exciting applications in the fields of PET myocardial perfusion, infection and inflammation imaging as well as SPECT in CAD and amyloidosis.

Our renowned international multidisciplinary faculty of expert imaging cardiologists and nuclear medicine physicians will provide a comprehensive overview of radionuclide PET and SPECT imaging in various cardiovascular diseases.

Attendees will be able to appreciate the strengths and understand the appropriate use of cardiovascular radionuclide imaging.

This virtual event will be of interest to all nuclear medicine physicians; radiologists – both consultants and trainees and cardiologists with special interest in imaging; trainees, clinical physicists, technologists and healthcare managers.

Educational aims:

- To understand the appropriate guidelines-based use of nuclear cardiology imaging for patients with known or suspected CAD using SPECT and PET.
- To understand the appropriate guidelines-based use of nuclear cardiology imaging for patients with suspected cardiac infection/inflammation and cardiac amyloidosis.
- At the conclusion of the webinar, the participant will have a better understanding of the role of nuclear cardiology in various clinical settings.

Programme Organisers

Dr Parthiban Arumugam, Clinical Director and Consultant Nuclear Medicine Physician,
Manchester University NHS Foundation Trust, UK

Dr Gopinath Gnanasegaran, Consultant Physician in Nuclear Medicine, Royal Free
London NHS Foundation Trust, UK

Dr Sharmila Dorbala, Immediate Past President-American Society of Nuclear
Cardiology; Associate Professor, Harvard Medical School and Brigham and Women's
Hospital, Boston, USA

Dr Randall C Thompson, President - American Society of Nuclear Cardiology
Saint Luke's Cardiovascular Consultants, Kansas City, USA

Moderators

Dr Parthiban Arumugam, Clinical Director and Consultant Nuclear Medicine Physician,
Manchester University NHS Foundation Trust, UK

Dr Gopinath Gnanasegaran, Consultant Physician in Nuclear Medicine, Royal Free
London NHS Foundation Trust, UK

Professor Jamshed Bomanji, Clinical Lead and Head of Department at the Institute of
Nuclear Medicine, University College London Hospitals NHS Foundation Trust, UK

Minimum dose and maximum speed

siemens-healthineers.co.uk/iqspect

A key trend in nuclear medicine is the ever-increasing demand for faster MPI exams. IQ•SPECT™ is a cardiac imaging solution that uses a combination of converging collimators, modified cardio-centric acquisition, and special reconstruction methods to deliver ultrafast cardiac imaging that is four times faster than conventional SPECT acquisition.

This unique approach can be combined with a general-purpose Symbia™ SPECT¹ or SPECT/CT so the system is able to perform all routine clinical applications, as well as ultrafast cardiac scans, with just a change in collimator and acquisition mode.

This adds flexibility and versatility to your department, enabling you to perform a larger volume and a wider range of procedures without additional dedicated equipment and space requirements.

14:00	Welcome and introduction Dr Parthiban Arumugam, Clinical Director and Consultant Nuclear Medicine Physician, Manchester University NHS Foundation Trust, UK
	Overview Dr Randall C Thompson, President - American Society of Nuclear Cardiology Saint Luke’s Cardiovascular Consultants, Kansas City, USA
14:05	Nuclear Cardiology Practice - Current guidelines: a European perspective Dr Nik Sabharwal, Consultant Cardiologist, Oxford University Hospitals NHS Foundation Trust, UK
14:20	Nuclear Cardiology Practice - Current guidelines: an American perspective Dr Rupa Sanghani, MD, Associate Professor, Rush University Medical Center, Chicago, Ill
14:35	MPI SPECT: Role in the era of hybrid imaging and quantitative PET Dr Randall Thompson, MD, FASNC, ASNC President, Saint Luke’s Mid America Heart Institute, Kansas City, MO
15:05	Cardiac perfusion PET-CT: what can it offer beyond MPI SPECT Dr Parthiban Arumugam, Clinical Director and Consultant Nuclear Medicine Physician, Manchester University NHS Foundation Trust, UK
15:35	Break
15:40	Molecular Imaging in Cardiac Sarcoidosis Dr Edward J. Miller, MD, PhD, FASNC, Yale University School of Medicine, New Haven, CT
16:00	Molecular Imaging in Cardiac Amyloidosis Dr Brett Sperry, MD, Saint Luke’s Mid America Heart Institute, Kansas City, MO
16:20	Cardiac device infection and Infective endocarditis: when to use FDG PET-CT Dr Sharmila Dorbala, MD, MASNC, ASNC, Immediate Past President, Brigham & Women’s Hospital, Harvard Medical School, Boston, MA
16:40	Break
16:45	Cases that effected patient management Moderator - Professor Jamshed Bomanji Case 1 - Dr Iain McGhie, MD, Saint Luke’s Mid America Heart Institute, Kansas City, MO Case 2 - Dr Panithaya Chareonthaitawee, MD, Mayo Clinic, Rochester, MN Case 3 - Dr Jamieson Bourque, MD, MPH, FASNC, University of Virginia Health Systems Charlottesville, VA Case 4 - Dr Kshama Wechalekar MD, Royal Brompton and Harefield Hospitals,London, UK
17:25	Case discussion Speakers - Iain McGhie, Panithaya Chareonthaitawee, Jamieson Bourque and Kshama Wechalekar
17:35	Closing remarks Dr Gopinath Gnanasegaran, Consultant Physician in Nuclear Medicine, Royal Free London NHS Foundation Trust, London, UK
17:40	Close of event
