HOW TO IMPROVE REPORTS

Virtual event

CPD: 3 CREDITS

Join us and learn how to improve the quality, style and usefulness of your radiology reports.

The radiology report will be broken down into a few different aspects and situations. Each lecture will look into one aspect (for e.g. how to communicate findings and express probability in a report), present the evidence on that topic and provide recommendations and tips on how to improve the report.

At the end of the event, you should be able to be much more aware of the various constituents that go into a report. You will have better knowledge of the evidence behind the many aspects of the report with a range of tools to analyse your own and others' reports, including thinking of way of improving them.

13:00 Welcome and introduction

13:05 How to write a bad radiology report

Dr Adrian Brady, Consultant Radiologist, Mercy University Hospital Cork and University College Cork; and First Vice President, ESR

13:35 How to create a great radiology report
