ACUTE AND EMERGENCY IMAGING EDUCATION DAY ORGANISED BY THE BIR SCOTTISH BRANCH

11 March 2022

This one-day education event will cover various aspects of acute and emergency imaging and intervention, including stroke, head and neck, cardiovascular, vascular, GI, GU, gynaecology and traumatic presentations, highlighting learning points and potential pitfalls.

The event is aimed at both Consultant Radiologists and trainees, although it would also be of interest to other medical professionals and allied health professionals such as radiographers.

Educational aims:

- To keep updated on the current and changing practices in diagnostic acute and emergency imaging
- To provide an overview of the utility of acute and emergency image guided intervention
- To establish and consolidate a systematic approach to trauma reporting and gain confidence in abilities to pick up subtle injuries

With thanks to our sponsor

12:00	Acute stroke imaging and neurointervention Dr Ahmed Iqbal, Consultant Neurointerventionalist, Queen Elizabeth University Hospital, Glasgow		
12:30	Lunch		

A person is seen from behind, sitting on a wooden dock that extends into a calm lake. The lake reflects the surrounding landscape, which includes steep, rocky mountains and a clear sky. The overall scene is peaceful and contemplative.

Your calling.
Your career.
Your life.

See the big picture.
