LUNG CANCER IMAGING- FROM BEDSIDE TO BENCH.... AND BACK AGAIN!

Not a month goes by without news of a technological development that could revolutionise lung cancer imaging, be it artificial intelligence-aided reporting and workflows, new tools for diagnostics and therapeutics, or new insights into the biology of lung cancer. However, just how focussed are these innovations on the needs of our patients, and what we as clinicians require to meet those needs? And how much can innovation, in turn, translate rapidly back into benefits for our patients?

In this multidisciplinary study day, we hear from thought leaders and experts from across the lung cancer spectrum as to what is missing from lung cancer imaging today, and what we need from our innovators to help drive quality for our patients, both nationally and locally in the UK. Highlights include lung cancer MDT breakout sessions, lessons for radiology from recent trials, and a “Challenge the Industry” session where we invite industry partners and clinicians to debate how existing or forthcoming innovations can meet the challenges laid down throughout the course of the day.

Programme Organiser

Dr Arjun Nair, Consultant Radiologist, University College London Hospital NHS Foundation Trust; Honorary Associate Professor, University College London Division of Medicine - Respiratory Medicine; Joint Clinical Lead, Targeted Lung Health Checks Programme, NHS England and NHS Improvement

09:15	Registration
09:35	Welcome and introduction
	Bedside back to bench: How should tech help us with these questions?
09:40	Nodule guidelines- what's missing? Speaker TBC
10:00	Assessing patient suitability for lung surgery Speaker TBC
10:20	Assessing patient suitability for lung radiotherapy Speaker TBC
10:40	Lung cancer- ivory tower practice vs reality Speaker TBC
11:00	Break
	Bench to bedside: Lessons for radiology from trials
11:30	Lessons for lung screening radiology screening- SUMMIT Speaker TBC
11:50	Lessons for lung cancer radiology: TracerX Speaker TBC
12:10	Lung cancer, technology, and trials: a patient's perspective Speaker TBC
12:30	Lunch
	Bench to bedside: "Challenge the industry"
13:30	Nodule software- what do we need? Speaker TBC
13:50	Biomarkers for lung cancer- integrating them into use now vs the future? Speaker TBC
14:10	Nav bronch- ready for prime time? Speaker TBC
14:30	Technology to aid Lung MDT preparation and admin - duplication of effort or truly beneficial? Speaker TBC
14:50	Rapid fire round: what would you like to see from industry? Speaker TBC
15:00	Break
	Bringing it all back to the patient
15:30	Rapid MDT round
16:30	Close of event
